Stop Chasing Email Threads.
Start Process Automation That Scales.

Autopilot replaces confusing emails, duplicate requests, and scattered internal tasks with one clear, guided workflow for onboarding, approvals, and other critical business processes.

Book a Live Demo

Being Disorganized Looks Unprofessional

Unclear next steps and endless back-and-forth emails make your organization look hard to work with. The result? Poor first impressions, avoidable delays, and unnecessary risk.

Autopilot replaces fragmented communication with structured, auditable workflows that keep everyone aligned.

Our Products

Product	Headline	Brief Description	CTA (Link to Micro-site)

Autopilot Onboarding	**One Coordinated Onboarding Flow**	Connect external parties with internal teams through a single, step-by-step digital process that captures clean, validated data from the start.	**Explore Onboarding**
Autopilot Approvals	**One Workflow for All Internal Teams**	Replace spreadsheets, inbox approvals, and mental checklists with parallel, auditable approval workflows that scale across teams.	**Explore Approvals**

The Autopilot Advantage

Made for People. Powered by Process. Enhanced by AI.

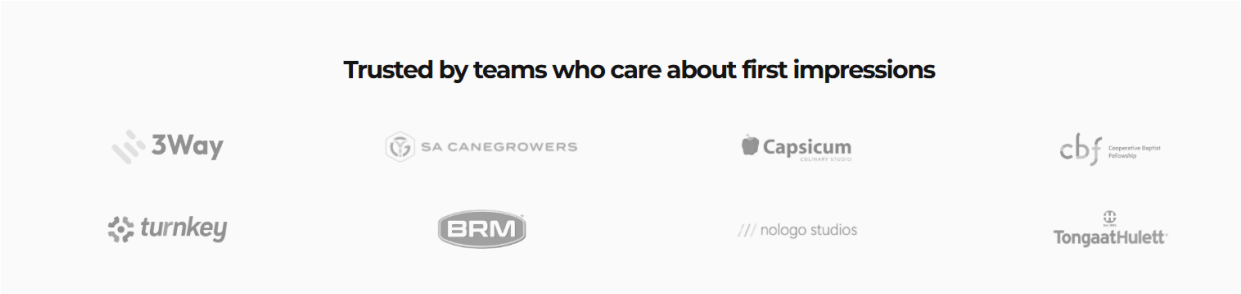
Key Features

Seamless Coordination: Stop chasing emails. Connect internal teams and external stakeholders in one guided workflow that ensures accurate, complete data capture

AI-Assisted Automation: Reduce manual effort with AI-powered document processing, validation, and routing - while keeping humans in control..

Bulletproof Compliance: Combine compliant e-signatures with tamper-evident storage and full audit trails for every workflow and document.

Effortless Management: Track progress in real time and see exactly who did what, when, and where - across every step of the process.



Real Results. Auditable Clarity.

Autopilot replaces guesswork with structure - cutting turnaround times while improving governance.

Success Stories:

LAWD: Halved time spent managing onboarding, supporting weekly new hires without an internal HR or IT team.

Syntech: Cut reseller approval time from 10 days to 1 day by pushing clean, validated data directly into CRM systems.

Partners

Strategic Alliances. Trusted Integration.

Built to Integrate. Powered by World-Class Technology.

Autopilot is built to integrate seamlessly with your existing systems - deploying inside or alongside Microsoft Teams without disrupting your broader technology stack.

Key Partner Showcase

We are a trusted Microsoft Partner, leveraging technologies like SharePoint to ensure secure storage and compliance. We integrate with compliant e-signature providers like DocuSign that meet legal and security requirements.

Implementation Partners

Expand Your Reach. Partner with Autopilot.

Autopilot works with certified implementation partners to deliver faster deployments and consistent outcomes for clients.

(Which other incentive can we add here?)

Focus Area	Key Benefit
Sales Collateral	Access to standardized sales decks and content to present our solutions effectively.

Growth Opportunities	Implement solutions for high-demand needs like employee and client onboarding.
Dedicated Support	Direct access to the Autopilot team for technical and sales enablement.

Clients/Case studies

Proven Success Across Industries

Leading organizations trust our solutions to manage high-volume, mission-critical processes. Our focus on transparent management and auditability ensures success in compliance-heavy environments.

Success Stories

LAWD: Halved time spent managing onboarding, supporting weekly new hires without an internal HR or IT team.

Syntech: Cut reseller approval time from 10 days to 1 day by pushing clean, validated data directly into CRM systems.

YMCA South Africa: Transformed their operational efficiency, reduced audit times, and enhanced financial accountability with Autopilot.

Talksure: Moved its procurement approvals into Microsoft Teams, reducing manual steps, cutting ERP licensing costs, and enabling flexible, user-friendly approvals with full audit trails.

RUBiQ: Rolled out Autopilot in hours, gaining enterprise-grade controls, easier approvals, and a smooth employee experience directly inside Microsoft Teams.

Cooperative Baptist Fellowship (CBF): Uses Autopilot inside Microsoft Teams to streamline key approval workflows, enabling faster decisions while maintaining strong governance and oversight.

SA Canegrowers: Digitized approval processes inside Microsoft Teams, improving process control, quick deployment, and organisation-wide adoption in just days.

Pricing

Our Licensing Model: Simple, Scalable, Predictable

At Autopilot, we believe pricing should reflect the value you receive. Our licensing is based on the actual number of **workflows or processes initiated per month**, making costs scalable and predictable as your organization grows.

A single license includes:

- Unlimited Internal Users
- Unlimited Forms and Process Types
- Unlimited External Users

Workflow Volume Fees (Monthly License)

(Revise pricing to USD)

Usage Tier	Fee Structure (Example ZAR)
Base License Fee	**R 7 500** (Includes the first 1–100 workflows initiated per month)
Tier 1 (101–1,000 workflows p/mo.)	**R 19 per workflow**

Tier 2 (1,001–5,000 workflows p/mo.)	**R 14 per workflow**
Tier 3 (5,001+ workflows p/mo.)	**R 9 per workflow**

Integrated 3rd Party Service Fees

If your solution requires advanced verification or e-signature services, these are integrated seamlessly into the platform and are billed per transaction, ensuring you only pay for what you use.

(Revise pricing to USD)

Service	Fee (Example ZAR)
e-signatures (DocuSign)	**R 40** per transaction
Bank Account Verification	**R 22** per transaction
CIPC Integration	**R 22** per transaction

AI Document Processing (Invoices/Receipts)	**R 0,50** per page
AI Document Processing (Custom documents)	**R 1,25** per page

About Us

Autopilot Turns Complexity into Clarity

Autopilot was founded in 2014 to solve the problem of disorganized, manual business processes inside modern organizations.

Today, Autopilot builds workflow automation solutions within the Microsoft ecosystem - helping organizations streamline onboarding, approvals, and internal processes while maintaining full accountability and compliance.

Whether coordinating HR, IT, Finance, Operations, or external vendors, Autopilot delivers faster, guided workflows with complete visibility.

The Autopilot Advantage

Process Expertise Meets Expert Integration.

We understand that effective workflow automation requires more than just software; it requires coordinating all stakeholders - from external customers and partners to internal teams like HR, IT, and Finance.

Seamless Coordination: We connect every team and external party involved, ensuring error-free, validated data is captured in one guided flow.

Bulletproof Compliance: We prioritize legal and security requirements, combining compliant e-signatures with tamper-evident storage and automatic archiving into systems like SharePoint or CRM.

Ready Integration: Our solutions are built to work with existing platforms, including key partnerships with Microsoft and DocuSign, providing powerful functionality right out of the box.

Our Founder

Adam Shapiro is a technology entrepreneur with over two decades of experience building and scaling digital businesses.

Born in Durban, South Africa, Adam completed his national service in the Navy and earned a Diploma in Company Administration from the Natal Technikon (now DUT). His early career combined operational roles, international work experience, and exposure to complex business environments - shaping a practical, process-driven approach to problem solving.

In 2001, Adam co-founded Pilotfish Digital, which he grew over two decades before its successful sale in 2022. In 2014, he and co-founder Hannes Bantjes launched Autopilot, a SaaS workflow automation platform designed to replace fragmented, manual processes with structured, auditable workflows.

Today, Adam focuses on helping organizations simplify complexity, improve accountability, and scale with confidence.

Driven by Workflow Specialists.

Our team is composed of workflow and integration specialists dedicated to understanding the intricacies of critical business processes. We focus on building solutions that are not only technologically advanced but also highly usable for both internal teams and external parties.
